

TIPS AND BEST PRACTICES

HIGH PRESSURE WASHERS

SAFETY

- Wear Personal Protective Equipment (PPE) appropriate to the worksite.
- Always unroll the reel completely.
- Keep the working environment clear.
- Comply with the rules for using equipment and products.
- Never target people, animals, etc.

PRODUCT

- Make sure the water used is clean.
- Make sure you have sufficient water flow for the washer you are using.

MACHINE

- Make sure you use the right fuel (for thermal machines).
- Make sure you have the right electrical power (for electric machines).
- Carry out maintenance as indicated in the user manual.
- Level the machine.
- Purge the air from the hose before starting.
- Press the gun trigger when starting the engine.
- Do not drag the lance along the ground.

ENVIRONMENT

- Make sure there is an area where the machine can be cleaned.
- Make sure you use the right fuel (for thermal machines).
